

Sonneborn Refined Products seeks candidates with an interest in **Summer Internship** and/or **Co-op** opportunities as a **Lab Technician** at its Petrolia, Pa. facility. Most of our Chemists have been hired out of the summer internship program including most recently a 2009 graduate and 2008 summer intern.

Ideally, you will have:

- Completed three years of undergraduate studies
- Major in Chemistry or Chemical Engineering
- Basic knowledge of college-level chemistry and chemical names/terminology
- Excellent communication and interpersonal skills; and demonstrated computer ability

However, you are also encouraged to apply, if you have:

- Completed at least two years of undergraduate studies
- Recently been awarded your B.S. degree
- Major in Environmental Engineering or Science, Mechanical Engineering, Petrochemical Engineering, or similar studies.

Lab Technician activities typically include:

- Perform chemical analyses, tests and determinations
- Learn and develop ability to interpret test results and determine their technical significance
- Oversee an individually assigned lab for the summer.

We seek candidates for both (candidate may express interest in either, or both):

- Summer Interns – classic, full time schedule in summer months
- Co-op – working with you and your college to identify a role that fits availability and needs of the student and our organization.

Co-op opportunity could begin immediately.

Please apply for Summer Internship at your earliest possibility, but no later than November 15th. Interviews for summer positions will be conducted in November and December.

Interested candidates are asked to submit their resume to:

anita.orozco@sonneborn.com

Put *Chemist Intern 10* in the subject line

Sonneborn is the world's largest dedicated manufacturer and supplier of high purity specialty hydrocarbons. Our primary products are white oils, petrolatums, plastics oils, PVC oil, microcrystalline waxes, and petroleum distillates. Many of the largest personal care, cosmetic, pharmaceutical, and food processing companies use Sonneborn's products for personal care items such as creams and lotions, cosmetics, and pharmaceutical ointments, as well as for food processing, agricultural dust suppression, polymer processing, telecommunications wire and cable, and air conditioning and refrigeration lubricants.

Sonneborn provides equal employment opportunity without regard to race, color, religion, gender, national origin, age, disability, or on any other basis prohibited by federal, state or local law.

Thank you for your interest in **Sonneborn** as a prospective employer.
